or ec@audubonptsa.org

Play chess and learn new strategies and tactics! Serious and just for fun games, chess puzzles and quizzes and of course, the bughouse! Chess sets, boards and class materials are provided, just come eager to learn!

The Game of Chess is not merely an idle amusement; several very valuable qualities of the mind, useful in the course of human life, are to be acquired and strengthened by it, so as to become habits ready on all occasions; for life is a kind of Chess, in which we have often points to gain, and competitors or adversaries to contend with, and in which there is a vast variety of good and ill events, that are, in some degree, the effect of prudence, or the want of it. By playing at Chess then, we may learn:

1st, Foresight, which looks a little into futurity, and considers the consequences that may attend an action ... **2nd, Circumspection**, which surveys the whole ... scene of action: - the relation of the several pieces, and their situations; ...

3rd, Caution, not to make our moves too hastily.

BENJAMIN FRANKLIN,

"The Morals of Chess"
